

EXPERIENCES

Lead Developer

2022 - 2023

TON Mendon

My work included the creation and execution of technical specifications, the development of data models, the creation of landing pages, telegram bots, web admins, the integration of external services, the generation and monetization of NFT collections, as well as configuration and deployment on the server. My goal is to create technical solutions that meet the set goals and objectives, and I am ready to use my knowledge and experience to achieve this goal.

PROJECTS

TON Mendon - the virtual country Mendon. Provides automatic registration and issuance of NFT passports and NFT cards, as well as convenient tools for interacting with NFT.

TON API Wrapper - python wrapper for tonapi.io.
